TRADITIONAL COMPOUND FEMININE NAMES IN THE SERBIAN ANTHROPNYMY

Rezumat: Categoria numelor bitematice formate din cuvinte vechi ale lexicului constituie cel mai vechi strat de nume sârbești. Ele sunt moștenite din limba slavă comună și sunt prezente și în sistemele antroponimice ale celorlalte popoare slave.

Numele bitematice și hipocoristicele simple provenite de la acestea au la bază apelative al căror sens s-a pierdut azi. Este adevărat că orice nume de persoană are la bază un nume comun, fapt valabil și în cazul temelor antroponimice din numele compuse. Însă, spre deosebire de categoria numelor laice întregi provenite din apelative, această grupă este mult mai greu de analizat din cauza vechimii și a lipsei surselor care să dea mărturie despre o motivație semantică sau alta.

Cuvinte cheie: nume, bitematic, hipocoristic, nume de persoană, nume comun, antroponomie

The categories of compound names created from common words of the language represent the oldest layer of Serbian names. They are inherited from old Slavonic language and are also present in the inventory of names of other Slavic people.

The names created through the process of compounding are formed from common words, but the semantic relation with these words is not visible anymore nowadays. It is true that every anthroponym originates from a common name, but, as opposed to the category of traditional lay names such as *Srna*, *Goluba*, *Ruža*, the category of compound names is far more difficult to analyse from a semantical perspective due to the ancientness of the names and lack of sources that could provide information about the motives that lead to the creation of these names. The most complex study regarding the etymology of the themes comprised in the compound names belongs to Franz Miklosich, *Die Bildung der slavischen*

Personennamen, Viena, 1860, who approaches the study of the anthroponymical themes from the Slavic languages (p. 30–118).

Most part of the compound names is created through motion with the suffixes *-a* and *-ka* from the masculine names. Some of them are newly created using the pattern of compounding such as *Blagomira* < masculine name *Blagomir*; *Veroljuba* < *Veroljub*, *Veroslava*. Some of them could be regarded as translations from Greek. Thus, *Božidara*, *Božidarka* could be interpreted as motional forms from the masculine name *Božidar* which corresponds to the Greek name *Θεόδωρος* or represent the direct translation of the feminine name *Θεοδόρα*; the same *Bogodarka* could be regarded as a translation of the Greek name *Θεοδόρα*.

The compound feminine names comprised in the Serbian anthroponymical system are sometimes preserved only in a derived form, that is why the register of names that we present below in order to illustrate this category of names contains all the graphic variants we found in the researched bibliographic material, all motional forms (with the suffixes *-a* and *-ka*) and the masculine name from which they were created. Due to the fact that the names which correspond to the ortographical norms are easily recognised, they are presented in alphabetical order, especially if we take into consideration that the names which lost the consonant «*l*» and are not perceived nowadays like variants, but like independent names.

Belisava (Grković RLIS 221) with the ijekavian variant *Bjelisava* (Grković RLIS 223, *Belislava* (Grković RLIS 221);

Živoslavka (Grković RLIS 253) < *Živoslav*.

The names listed above are feminine names created through motion from old masculine names. The Serbian inventory of names also contains a series of compound names created from Slavic themes, but which were created much later by analogy with the old compound names.

The new names comprised in the dictionary of Milica Grković are the following:

Blagomira (p. 223), *Blagomirka* (p. 223) < *Blagomir*;
Jugoslava (p. 263), *Jugoslavka* (p. 263) < *Jugoslav*;
Lepomirka (p. 271) < *Lepomir*;
Milomira (p. 280), *Milomirka* (p. 280) < *Milomir*;
Miomira (p. 281), *Miomirka* (p. 281) < *Miomir*;
Mirodarka (p. 282) < *Mirodar*;
Mladomira (p. 282), *Mladomirka* (p. 282) < *Mladomir* (after the pattern of *Dragomir*, *Živomir*);
Radoljupka (p. 297) < *Radoljub* (created after the pattern of *Bogoljub*);
Rodoljupka (p. 299) < *Rodoljub*;
Sretislava (p. 308);
Titoslava (p. 313);
Veroljuba (p. 230) < *Veroljub*;
Veroslava (p. 230), *Veroslavka* (p. 230);
Vilogorka (p. 231);
Viogorka (p. 231);
Volislava (p. 233) < *Volislav*;
Zdravomirka (p. 254) < *Zdravomir*;
Zlatomirka (p. 255) < *Zlatomir*;
Živodarka (p. 253) < *Živodar*;
Živoljupka (p. 253) < *Živoljub*.

Along these two categories created exclusively from Slavic themes, the Serbian system of names contains small categories of names in which the first element is a hypocoristic form derived from a calendar name or a Slavic name:

Dikosava (Novaković 59, Karadžić 129, Miklosich 57), *Dikoslava* (Grković RLIS 243) < *Dika* < *Dimitrija*, *Dmitra*;

Durisava (Novaković 121, Karadžić 162), *Durislava* (Grković RLIS 249) < *Durisav* < *Dura* and the theme *slav*;

Kandosava (Grković RLIS 264) < *Kanda* < *Kandakija* and the theme *slav*;

Kojislava (Bogosavljević 53) < *Kojislav* < *Koja* < *Konstantin* and the theme *slav*;

Krstomirka (Grković RLIS 268) < *Krstomir* (< hypocoristic form *Krsta*, translation of the Greek name *Σταβριος* or a hypocoristic form from *Hristifor*, *Hristofor* and the theme *mir*);

Krstoslava (Grković RLIS 268) < *Krsta* and the theme *slav*;

Nikosava (Miklosich 83), *Nikoslava* (Grković RLIS 286) < *Nika* < *Nikolija* and the theme *slav*;

Perisava (Grković RLIS 292), *Perislava* (Grković RLIS 292) < *Pera* < *Petra*, *Petrija* and the theme *slav*, or a motional form from the masculine name *Perislav* created from the hypocoristic form *Pera* < *Petar* and the theme *slav*;

Petroslava (Grković RLIS 293) < *Petra* and the theme *slav*;

Teoslava (Grković RLIS 313) < *Teos* (gr. *Θεός*) and the theme *slav*;

Tomislava (T. O. 66), *Tomislavka* (Grković RLIS 314) < *Tomislav*, created from the masculine name *Toma* and the theme *slav*.

The Serbian feminine anthroponymy also contains a small category of personal names created from names which originate from common words of the vocabulary and Slavic themes:

Krunislava (Grković RLIS 268), *Krunosava* (Grković RLIS 268), *Krunoslava* (Grković RLIS 268) < *Kruna* < *kruna* “crown” and the theme *slav*. The feminine names *Krunislava*, *Krunoslava* could also be regarded as motional forms from the masculine names *Krunislav*, *Krunoslav*.

Name that could receive double interpretations:

Manislava (T. O. 63) < *Manislav*, name that could be regarded as a compound from Slavic themes or as a name created from the hypocoristic *Mana* < *Manasije* and the theme *slav*.

Mikosava (Grković RLIS 278), *Mikoslava* (Grković RLIS 278), name that can be analysed from the hypocoristic form *Mika* < *Milanka* (case in which we are talking about a hypocoristic form of Slavic origin) or *Mihaila* (case in which the hypocoristic form comes from a calendar name), or regarded as a motional creation from the masculine name *Mikoslav* created from < *Mika* < *Mihailo*, *Milosav*, *Milutin* and the theme *slav*;

Tinkosava (Grković RLIS 313), *Tinkoslava* (Grković RLIS 313), created from the derived form *Tinka* < *Tina* < *Tijana* (variant of the Slavic derivative *Tihana*) or *Tinka* < *Tina* < *Hristina* (calendar name), situation in which we are talking about a compound created from a derived anthroponym of calendar origin and the theme *slav*.
